SCALA FOR D.S PRACTICAL 20

Roll No. : F051	Name: RAHUL YADAV
Class : SYIT	Batch : 1
Date of Assignment :18/08/2026	Date/Time of Submission :18/08/2026

PRACTICAL 20

Question:

Read a CSV file and calculate basic statistics for each numeric column.

Use the scala-csv library or similar tools.

CODE:

```
build.sbt  Demo.scala  Iris.csv

import scala.io.Source
object Demo extends App {
  val file = Source.fromResource("iris.csv")
  val data = file.getLines()
    .drop(1)
    .map(line => line.split(",")(0).toDouble)
    .toList

  file.close()

  val count = data.length
  val mean = data.sum / count
  val min = data.min
  val max = data.max

  val variance = data.map(x => math.pow(x - mean, 2)).sum / count

  val std = math.sqrt(variance)

  println(s"Count: $count")
  println(f"Mean: $mean%.2f")
  println(f"Minimum: $min%.2f")
  println(f"Maximum: $max%.2f")
  println(f"Standard Deviation: $std%.2f")
}
```

OUTPUT:

```
Run  Demo  x

Mean: 75.50
Minimum: 1.00
Maximum: 150.00
Standard Deviation: 43.30

Process finished with exit code 0
```
